

Yajat Mehta

+1 (623) 273 4531 | official.yajatmehta@gmail.com | [LinkedIn](#) | Tempe, AZ

EDUCATION

Arizona State University

B.S., Business Data Analytics | B.S., Artificial Intelligence in Business | GPA: 3.56

August 2022 – May 2026

Tempe, AZ

SKILLS

AI & ML: Python, Scikit-learn, TensorFlow, PyTorch, NLP, RAG, Text Classification, Word2Vec, Random Forest, Logistic Regression, GridSearchCV, Recommender Systems

Cloud & Big Data: Google Cloud Platform, Google Cloud Storage, PySpark, Spark ML

Backend & APIs: FastAPI, Supabase, PostgreSQL, Redis, Google OAuth, REST APIs, Docker

Data & Analysis: Pandas, NumPy, Tableau, SQL, Data Visualization, Feature Engineering

Tools: Git, VS Code, Google Colab, Postman, Figma

Certifications: AWS: Machine Learning for Natural Language Processing; AWS Academy: Machine Learning Foundations

WORK EXPERIENCE

Founder & Developer — Rumore, Campus Social Platform

2025 – Present

FastAPI, Supabase, PostgreSQL, Redis, React Native/Expo, Google OAuth

Tempe, AZ

- Built and deployed a full-stack mobile platform with identity-separated user flows, scoped authentication, and campus-based access control for privacy-sensitive student communities.
- Architected backend services using **FastAPI**, **Redis**, and **Supabase PostgreSQL** to handle secure token management, session control, and protected API access at scale.
- Designed moderation workflows and product roadmap for launch across Indian college campuses, adapting platform architecture for multi-campus scalability.

PROJECTS

Marketing Assistant AI Agent

May 2026

- Built a **Python**-based AI agent that enables marketers to query campaign performance data, audience trends, and business documents through a single conversational interface.
- Designed an end-to-end agent workflow covering data aggregation, validation, insight generation, and report refinement — keeping human decision-makers in control of final outputs.
- Evaluated AI system risks including hallucinated metrics, incomplete data retrieval, privacy exposure, and tool dependency to inform responsible deployment.

Sentiment Analysis Using GCP and PySpark

May 2025

- Built a scalable **PySpark** NLP pipeline on **Google Cloud Platform** to classify Amazon review sentiment, applying tokenization, stopword removal, **Word2Vec** vectorization, and **Random Forest** classification.
- Evaluated model performance using F1 score across pipeline variants (with and without punctuation removal); persisted the trained Spark ML model to **GCS** for reuse.

Factors Influencing Heart Disease

December 2024

- Trained and evaluated **Logistic Regression** and **Random Forest** classifiers on a Kaggle heart disease dataset using an 80/20 train-test split, feature scaling, and **GridSearchCV** hyperparameter tuning.
- Achieved **82% accuracy**, **90% recall**, and **0.86 AUC**; identified chest pain type, number of major vessels, and maximum heart rate as dominant predictors via correlation heatmaps and feature selection.

Medicaid Pharmaceutical Spending Analysis

May 2026

- Analyzed Medicaid drug reimbursement and population datasets to surface high-cost drug patterns and state-level spending variation; built **Tableau** dashboards with per-capita calculated fields to communicate findings to non-technical stakeholders.

ACADEMIC EXPERIENCE

Desk Aide

August 2023 – February 2026

Arizona State University | Documentation, Operations

Tempe, AZ

- Maintained housing records and administrative documentation in compliance with **FERPA** confidentiality standards across a high-volume residential environment.
