EDUCATION

Arizona State University

B.S., Business Data Analytics | *B.S., Artificial Intelligence in Business* | *GPA: 3.56*

August 2022 – May 2026

Tempe, AZ

SKILLS

Governance, Risk & Compliance: COBIT, ISO 27001, NIST CSF, BCP/DRP, Risk Mitigation Planning, Compliance Frameworks, Regulatory Mapping

Security & Access Control: Authentication Architecture, OAuth 2.0, Token Management, Role-Based Access Control, Session Control, Data Privacy, FERPA

Systems & Documentation: SDLC, Requirements Analysis, DFDs, ERDs, Use Cases, Risk Registers, Gantt Planning, Stakeholder Reporting

Data & Analysis: SQL, Python, Pandas, Tableau, Excel, Data Governance, Anomaly Detection

Tools: Git, Docker, Postman, VS Code, Supabase, PostgreSQL

WORK EXPERIENCE

Founder & Developer — Rumore, Campus Social Platform

2025 – Present

FastAPI, Supabase, PostgreSQL, Redis, Google OAuth

Tempe, AZ

- Designed and implemented a security-first authentication architecture using **Google OAuth 2.0**, **Redis**-based token management, and campus-scoped access control to enforce strict identity boundaries across user populations.
- Built role-separated user flows with protected API endpoints, session lifecycle controls, and moderation workflows to prevent unauthorized access and enforce platform data boundaries.
- Applied privacy-by-design principles to handle sensitive student data, separating anonymous and identified identity layers to minimize exposure risk.

Desk Aide

August 2023 – February 2026

Arizona State University | *Housing Operations, Documentation*

Tempe, AZ

- Handled sensitive student housing records, key-access requests, and lock-change documentation in strict compliance with **FERPA** confidentiality requirements.
- Managed access control operations including lockouts, key checkouts, and lock-change authorizations — enforcing physical access policies across a high-traffic residential environment.

PROJECTS

IT Governance and Consulting — Jefford's Risk Mitigation

Spring 2026

- Led a team of six to design an agile InfoSec management framework and 8-quarter risk mitigation roadmap, mapping initiatives across **BCP/DRP** development, laptop encryption, automated malware patching, and fraud protection.
- Verified all deliverables against **COBIT**, **ISO 27001**, and **NIST CSF** standards; presented phased implementation timelines via Gantt charts covering regulatory compliance across EU, U.S., and international data jurisdictions.
- Scoped cross-border compliance requirements and mapped initiative priorities against organizational risk tolerance across an 8-quarter execution window.

Student Event Management System (SEMS) — Access Control Design

2025

- Defined role-based access control workflows for students, organizers, and administrators — enforcing least-privilege principles across event creation, approval, RSVP management, check-in, and reporting functions.
- Produced complete **SDLC** documentation including stakeholder analysis, functional/non-functional security requirements, **DFDs**, and **ERD** to support compliant system implementation.

Airbnb Trust, Safety & Fraud Risk Analysis

April 2026

- Assessed Airbnb's platform-level fraud, identity verification, and quality-control risks using **PESTEL**, **Porter's Five Forces**, **VRIO**, and **SWOT** frameworks — identifying brand fragility as the highest-priority systemic risk.
- Recommended AI-driven fraud detection, strengthened host/guest verification, and off-platform transaction monitoring as phased risk controls across short-, mid-, and long-term horizons.

Medicaid Pharmaceutical Spending — Data Governance & Analysis

May 2026

- Applied structured data governance practices to clean, validate, and analyze Medicaid reimbursement datasets; built **Tableau** dashboards surfacing cost anomalies and state-level spending risk for policy decision-making.
