

Yajat Mehta

+1 (623) 273 4531 | official.yajatmehta@gmail.com | [LinkedIn](#) | Tempe, AZ

EDUCATION

Arizona State University

B.S., Business Data Analytics | B.S., Artificial Intelligence in Business | GPA: 3.56

August 2022 – May 2026

Tempe, AZ

SKILLS

Product & Strategy: Product Roadmapping, User Story Mapping, Requirements Analysis, SDLC, Stakeholder Analysis, Use Cases, DFDs, ERDs, UI Wireframes

Backend & APIs: Python, FastAPI, Supabase, PostgreSQL, Redis, Google OAuth, REST APIs, Docker

Frontend & Mobile: React Native, Expo, JavaScript, TypeScript, HTML, CSS

AI & Data: Pandas, NumPy, Scikit-learn, NLP, Tableau, SQL, Data Visualization

Tools: Git, GitHub, Figma, VS Code, Postman

WORK EXPERIENCE

Founder & Developer — Rumore, Campus Social Platform

2025 – Present

FastAPI, Supabase, PostgreSQL, Redis, React Native/Expo, Google OAuth

Tempe, AZ

- Founded and built a mobile-first campus social platform from zero, owning product strategy, user flows, backend architecture, authentication design, moderation workflows, and go-to-market planning.
- Defined Rumore's product thesis around fragmented campus social behavior, combining anonymous posting, campus-based communities, identity-separated interaction, and phased launch mechanics into a single student engagement platform.
- Engineered backend infrastructure using **FastAPI**, **Supabase PostgreSQL**, **Redis**, and custom **Google OAuth** flows to support anonymous posting, secure login, token handling, and campus-scoped access control.
- Designed a privacy-focused identity architecture separating anonymous community activity from account-level authentication, reducing identity correlation risk while preserving moderation and access-control capability.
- Developed a phased go-to-market strategy for Indian college campuses, prioritizing controlled community launches, campus-specific onboarding, moderation readiness, and early-user feedback loops before broader expansion.

Data Analyst Intern

May 2023 – August 2023

Mehta Papers Pvt. Ltd. | Excel, Tableau, Sales Analysis

Delhi, India

- Analyzed sales, pricing, and supplier data to identify seasonal demand patterns and support purchasing decisions ahead of school-year peak demand.
- Built Tableau dashboards and Excel reports that replaced ad hoc reporting with a repeatable, data-driven decision framework for a wholesale distribution business.

PROJECTS

Marketing Assistant AI Agent

May 2026

- Designed and built a **Python**-based AI agent product that gives marketers a single interface to query campaign data, surface insights, and generate reports, replacing fragmented manual workflows.
- Defined the agent's end-to-end workflow: data aggregation, validation, insight generation, report building, and feedback refinement with explicit human oversight built into decision stages.
- Scoped product risks including hallucinated outputs, missing data retrieval, privacy exposure, and accountability gaps, then designed mitigation steps into the system workflow.

Student Event Management System (SEMS)

2025

- Led end-to-end product design for a campus event platform by defining stakeholder needs, mapping role-based workflows for students, organizers, and admins, and producing full **SDLC** documentation.
- Delivered use cases, **DFDs**, **ERD**, functional and non-functional requirements, and UI wireframes covering event creation, approval, RSVP enforcement, check-in, and reporting.

Airbnb Strategic Analysis & Recommendation

April 2026

- Identified brand fragility and trust erosion as Airbnb's core strategic risk using **PESTEL**, **Porter's Five Forces**, **VRIO**, and **SWOT** frameworks.
- Proposed a phased product and policy roadmap including stronger host/guest verification, AI-driven fraud detection, and quality-control improvements to defend against substitution pressure and protect platform value.
